

TINASHE MAKAMURE

DATA SCIENCE MANAGER · AGENTIC AI

Johannesburg, Gauteng | tinashe@tinashemakamure.co.za | tinashemakamure.co.za

28 July 2026

Dear Hiring Manager,

I am writing to introduce myself as a Data Science Manager specialising in Agentic AI, with a track record of turning cutting-edge AI innovation into secure, scalable and measurable business impact. Over the past several years I have grown from a cloud and software engineer into an AI leader, and I would welcome the opportunity to bring that blend of hands-on engineering depth and delivery leadership to your organisation.

My career has spanned the full delivery lifecycle. I began building and securing cloud architectures with Terraform for financial-services and retail clients, moved into DevOps and platform engineering on Kubernetes and AWS for a major bank, and then into data engineering and analytics on Microsoft Fabric, building ETL pipelines, dimensional models and Power BI reporting. Most recently, as a Senior AI Engineer at Betway Africa, I delivered production machine-learning and AI solutions, including an AML, Fraud and Responsible-Gambling platform using unsupervised learning, a real-time Retrieval-Augmented Generation (RAG) knowledge assistant, and an OCR-powered expense-tracking system built on Azure Document Intelligence.

In my current role as Data Science Manager for Agentic AI, I lead initiatives that shape how AI is adopted across the enterprise. My focus is a scalable enterprise framework that lets organisations deploy AI agents securely, responsibly and effectively. This work drives governed AI adoption, robust AI governance and risk management, cost-effective and scalable solutions, and productivity transformation through AI-powered agents embedded directly into business workflows.

Beyond the technology, I bring the leadership and communication skills to make it land: mentoring engineers, facilitating agile delivery, managing sub-teams end to end, and engaging stakeholders to bridge cutting-edge innovation with real business outcomes. My work is backed by industry certifications across AWS (Solutions Architect, Developer, Cloud Practitioner), Microsoft Azure and Fabric, and the Certified Kubernetes Administrator credential.

I would relish the chance to help your teams work smarter and unlock new levels of productivity through enterprise AI transformation. Thank you for your time and consideration, and I would be delighted to discuss how I can contribute.

Sincerely,

Tinashe Makamure
